Regarding claim 2, the method as recited in Claim 1, further comprising:

- after downloading the new essential software, attempting to operate the a device and provide external communications using the new essential software (10:35 – 40, see satisfy baseline requirements and display start up screens, and 50 – 55, also see cancel to exit setup, note: this is done after installation of baseline components (essential software)).

Regarding claim 4, the method as recited in Claim 1, wherein the device is a managed device (5:15 – 28, see PC or peer device).

Regarding claim 5, the method as recited in Claim 1, wherein the external to source includes a server device (5: 20 – 23, see server).

Regarding claim 6, the method as recited in Claim 1, wherein the external source includes a network (5:20 – 25).
